SECURE MANAGED  
HOSTING

Your search for reliable website hosting ends here...

### Redundant Data is Reliable Data.

You need a hosting provider that offers:

- a) HIGH-PERFORMANCE
- b) RELIABILITY
- c) SECURITY

Does your current provider measure up?

Why We Succeed:

- frequent backups
- offsite backups
- state of the art hardware
- secured access
- knowledgeable technicians
- quadruple upstream redundancy

### High-Performance, Reliability, Security

DataSpaces offers "Tier-One" hosted servers for the best in performance, reliability and security. Our systems are built to deliver fast response times under peak loads by spreading hosting responsibilities across multiple servers in 4 geographic locations. With that kind of redundancy and performance, you have found your final hosting solution.

We are also pleased to enhance our services with web-based business management tools, content management systems, webmail services, custom order processing, online reservations shopping carts, website analytics and more.

We employ industry best practices and run systems alongside Fortune 500 companies. What makes us stand above the crowd? Our infrastructure is served by:

- 2 locomotive-sized diesel power backup generators
- offsite redundancy
- connectivity redundancy
- hardware redundancy
- state of the art fire detection and suppression
- bio-metric security
- 24-hour manned monitoring and security
